We all work hard to achieve success.

But what has the potential to change the outcome for the better?

**Focus.**

Focus is what helps achievers define their goals and stay on track towards reaching them. In investing too, a focused approach to stock selection helps us skip past the mediocre businesses and invest only in those with the potential to take us to our goal of wealth creation. With focus, our fund managers stay committed to their high conviction ideas.

## Why invest in focused fund now?

Focused Fund as a strategy is worthy of consideration in all time periods given its inherent nature of targeting high conviction ideas as these funds typically invest in few stocks in a concentrated manner. Adding to it, the unprecedented challenges and high stock market volatility we face now call for a greater focus on stock selection. With the current economic disruption and uncertainty looming high over equity markets, we feel that extraordinary vigil and meticulous approach is the need of the hour to build a sound portfolio.

**Our quest to identify such companies, which score high on quality and earnings growth, leads us to unveil a fund focussed on our 20 high conviction stock ideas.**

We believe that a focused approach has the potential to generate alpha from a concentrated portfolio, albeit at a higher risk. The strategy assumes significance specifically when there is huge divergence in stock returns across the sectors and within the sector. This has been proven by the fact that only a handful of stocks have contributed to most of the index returns, at various points in time (please refer the chart below).

### Top 10 stocks contribution to Nifty 50 and S&P BSE 500

Nifty 50 & S&P BSE 500 has delivered -1.19% and -0.85% returns respectively, whereas its Top 10 stocks have delivered positive returns of 3.76% & 3.25% respectively in CY 22, thus protecting from further downside

## Key Features

### Striking a balance between conviction and diversification

With a high level of conviction in every stock position, the fund portfolio will not exceed 20 stocks. The fund will have a sizeable allocation to each stock idea, yet maintain an equilibrium between conviction and diversification.

### Multicap portfolio

The fund invests across market capitalization, currently a large part of the portfolio is dedicated to largecap stocks (~50% - 70%). The midcaps comprise approximately 30% - 50% of the portfolio, while smallcap stocks constitute around 0% - 20% of the portfolio.

Note: Based on current views and may change from time to time. The Fund has a multicap portfolio with flexibility to move across market cap bands.

### Blend of growth and value stocks

The portfolio comprises of both growth and value stocks, i.e. high growth companies as well as the companies demonstrating higher growth prospect but available at reasonable valuations.

### Stringent risk management

Risk management is an integral part of our investment process. The Asset Management Company (AMC) has incorporated adequate safeguards to manage risk in the portfolio construction process.

## Investment Strategy & Portfolio Construction Guidelines

- The fund invests in upto 20 stocks.
- It has a Multicap portfolio with flexibility to move across market cap bands and will be style neutral.
- The fund aims to generate alpha<sup>1</sup> from a concentrated portfolio, albeit at a higher risk.
- Stock selection is guided by our investment philosophy and proprietary stock categorization framework.
- Our process driven approach assist us in filtering the best investment ideas and contain the downside risk.
- The fund adopts a fully invested approach (~95% invested)<sup>2</sup>

<sup>1</sup>Alpha is defined as excess returns over benchmark.

<sup>2</sup>Based on our current view on equity market.
