Investment Strategy of the Scheme

The Scheme seeks to generate capital appreciation by investing in equity and equity-related instruments of technology-centric and technology-dependent companies both within India and internationally. The Scheme will follow active investment strategy and will invest across market capitalization. The fund manager will adopt a combination of top-down and bottom-up approaches to identify companies with high growth potential in the realms of technology development & application and focus on companies spearheading transformative innovations in fields such as technology, automation, robotics, artificial intelligence, cloud computing, and other sectors, including those benefiting from increased digital adoption.

The indicative list of businesses within the technology sector includes IT services, engineering research & development firms, consulting and outsourcing companies, IT hardware and/or software entities, e-commerce, technology platforms, IT infrastructure providers like data centers, digital infrastructure providers, leased line providers, fintech companies, internet companies, digital service providers, electronics, telecom and telecom-related services, semi-conductors, networking companies, media and media infrastructure, biotechnology and data solutions providers etc.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- Investing in a sectoral fund is based on the premise that the Scheme will seek to invest in companies belonging to only specific theme/sector. In line with the investment objective, the Scheme will seek to invest in equity and equity related instruments of technology companies belonging to the technology industries and hence will be affected by risks associated with the technology sector / industries and hence concentration risk is expected to be high. The performance of the companies which form the investment universe of this Scheme would be affected by the growth and performance of the technology sector in the country.

• **Risk associated with Equity and Equity Related Instruments:**

Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, general decline in the Indian markets, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAVs of the Units issued under the Scheme may be adversely affected.

Further, the Equity and Equity Related Instruments are risk capital and are subordinate in the right of payment to other securities, including debt securities.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

Further, the volatility of medium / small - capitalization stocks may be higher in comparison to liquid large capitalization stocks.

• **Risk associated with Fixed Income and Money Market Instruments:**

Interest - Rate Risk

Fixed Income and Money Market Instruments run interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rate falls, the prices increase. The extent of rise or fall in the price is a function of existing coupon, days to maturity, increase or decrease in the level of interest, credit quality, demand and supply. However, in case of Government securities credit risk remains zero, their prices are influenced by the movement in interest rates in the financial system.

In case of floating rate instruments, an additional risk could arise because of changes in spreads of floating rate instruments. With increase in spread of floating rate instruments, the price can fall and with decrease in spread of floating rate instruments, the prices can rise. Moreover, the floating rate instruments having a periodical interest rate reset carry lower interest rate risk compared to a fixed rate debt security. However, in the falling interest rate scenario, the returns on floating rate debt instruments may not be better than those on fixed rate debt instruments.

Credit Risk

Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may be affected because of change in the credit rating of the issuer/instrument and the price of a security goes down if the credit rating agency downgrades the rating of the issuer. In case of Government Securities, there is minimal credit risk to that extent.

Lower rated or unrated securities are more likely to react to developments affecting the market and credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated or unrated securities also tend to be more sensitive to economic conditions than higher rated securities.

Liquidity or Marketability Risk

The ability of the Scheme to execute sale/purchase order is dependent on the liquidity or marketability. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The securities that are listed on the stock exchange carry lower liquidity risk, but the ability to sell these securities is limited by the overall trading volumes. Further, different segments of Indian financial markets have different settlement cycles and may be extended significantly by unforeseen circumstances.

Securities which are not quoted on the stock exchange(s) may be illiquid and can carry higher liquidity risk in comparison with securities which are listed on the stock exchange(s) and offer exit option to the investor including put option. The Scheme would invest in the securities which are not listed but offer attractive yields. This may however increase the risk of the portfolio.

Re-investment Risk

This refers to the interest rate risk at which the intermediate cash flows received from the securities in the Scheme including maturity proceeds are reinvested. Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.

For details on risk factors and risk mitigation measures, please refer SID.

- The unit holder who has opted for STP under a specific scheme can also redeem or switch his units to any other eligible scheme provided he has sufficient balance in his account on the date of such a request.
- STP (in) and SWP cannot be simultaneously registered for a folio for the same scheme.
- In case the unit balance in the source (transferor) scheme is lesser than amount specified by the Unit holders for STP, the AMC will transfer remaining unit balance to target (transferee) scheme and STP will be closed.
- The facility will be automatically terminated if the units under the source (transferor)

scheme are pledged or upon receipt of intimation of death of the Unit holder or if all units are liquidated or withdrawn from the source (transferor) scheme or the units balance under the folio becomes nil.

- The application for start of STP should be submitted to Official Point(s) of Acceptance at least 7 days and not more than 60 days before the date of commencement / start date of STP. Unit holder may change the amount (but not below the minimum specified) / frequency by giving written notice to any of the Official Point(s) of Acceptance at least 7 days prior to next transfer/ STP execution date.
- Unit holder can discontinue STP facility at any time by sending a STP cancellation form to any of the Official Point(s) of Acceptance, at least 7 days prior to next transfer / STP execution date.
- Unit holders details and mode of holding in the target (transferee) scheme will be as per the existing folio in the source (transferor) scheme. Units in the transferee scheme will be allotted in the same folio.
- The Scheme offers Systematic Transfer Plan during the New Fund Offer Period through physical mode. STP facility during NFO is not available on Stock Exchange Platforms and other Digital Platforms.

- The unit holder can transfer Rs.500 or above on monthly/quarterly (April/ July/ Oct/ Jan) basis by transfer of appreciation, if any, in the value of Units. In appreciation option, if, on the date of transfer, there is no appreciation or appreciation is less than Rs. 500, then transfer will not be done.
- Capital appreciation, if any, will be calculated from the enrolment date of the STP, till first transfer date. Subsequent capital appreciation, if any, will be the capital appreciation between the previous STP date (where STP has been processed and transferred) and the current STP date.
- Appreciation option will be applicable for all schemes except Invesco India ELSS Tax Saver Fundas target scheme.

Flex STP

- Flex STP is a facility wherein an investor under any of the existing designated open ended debt / liquid Scheme(s) ("Transferor Scheme") of the Fund can opt to transfer variable amount linked to value of his investments, on predetermined date to "Growth Option" of designated open-ended equity Scheme(s) ("Transferee Scheme") except Invesco India ELSS Tax Saver Fund.
- Under the Flex STP Option, the amount to be transferred in the Transferee (Target) Scheme on the date of transfer shall be higher of: Fixed amount to be transferred per installment as specified by the investor; Or The amount determined by using following formula:
Fixed amount to be transferred per installment as specified by the investor X number of installments (including the current installment) minus market value of investments through Flex STP.

In case of Flex STP if the amount (as specified by the formula) to be transferred under STP is not available in the Transferor Scheme in the unit holder's account, the residual amount will be transferred to the Transferee Scheme and Flex STP will be closed.

- If the NAV falls continuously during the Flex STP Option period, number of actual installments may be less than those mentioned in the Flex STP Option enrolment form.
- The total amount invested in the Transferee (Target) Scheme through Flex STP Option shall not exceed the total amount of investment specified by the investor at the time of enrolment of Flex STP Option i.e. amount per instalment x number of enrolled instalments.
- If there is any other Financial Transaction like Purchase, Redemption, Switch etc. (all special products as well) processed in the target scheme in the same folio during the tenure of Flex STP, then Flex STP will be processed as fixed STP for the rest of the installments for the fixed amount.

Illustration: Flex STP will work as follows:

Installment amount to be transferred	Rs. 3,000/-
No. of Installments	12
STP period	September 2016 - August 2017
STP Start Date	3rd of the month

Calculation of Flex STP installment amount on the date of the fifth installment i.e. January 3, 2017.

- Total units allotted up to the date of last (fourth) instalment i.e. December 3, 2016 is assumed as 823;
 - NAV as on January 3, 2017 of Growth option of Transferee Scheme is assumed as Rs. 12/- per unit;
 - Hence, the market value of investment in the Transferee Scheme on the date of transfer of fifth instalment i.e. January 3, 2017 will be Rs 9,876/- (823*12).
The installment amount for fifth instalment will be calculated as follows:
 - Fixed amount to be transferred per installment: Rs. 3,000/- Or
 - As determined by the formula: $(3,000 \times 5) - 9,876 = \text{Rs. } 5,124/-$.
a. Or b. whichever is higher :
Hence, the installment amount to be transferred in the Transferee Scheme on January 3, 2017 will be Rs. 5,124/-.
- The first Flex STP installment will be processed for the fixed installment amount specified by the investor at the time of enrolment. From the second Flex STP installment onwards, the transfer amount shall be computed as per formula stated above.
 - Flex STP is available for Monthly and Quarterly frequencies.
 - Flex STP is available only in 'Growth' option of the Target Scheme.
 - A single Flex STP enrolment form can be filled for transfer into one Scheme/Plan/ Option only.
