# Invesco India Focused 20 Equity Fund

(An open ended equity scheme investing in maximum 20 stocks across market capitalization (i.e. Multicap))

## Investment Objective

To generate capital appreciation by investing in upto 20 stocks across market capitalization.

However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.

## Asset Allocation Pattern of the Scheme

Under normal circumstances, the asset allocation of the Scheme would be as follows:

Type of Instruments	Normal Allocation (% of net assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Equity & Equity Related Instruments	65	100	High
Debt & Money Market Instruments	0	35	Low to Medium
Units issued by REITs and InvITs	0	10	Medium to High

Debt instruments may include Government Securities. It may also include securitized debt (including pass through certificates (PTC)) up to 20% of the net assets of the Scheme. The Scheme will not invest in foreign securitized debt.

The investments in debt instruments having Structured Obligations (SO Rating) / Credit Enhancements (CE Rating) will be restricted to 10% of debt portfolio and the group exposure in such instruments shall not exceed 5% of its debt portfolio.

The Scheme may seek investment opportunity in foreign securities in accordance with the guidelines stipulated by SEBI and RBI from time to time. The exposure to foreign securities (including mutual fund and other approved securities) shall not exceed 30% of the net assets of the Scheme.

The Scheme may use derivatives (including debt derivatives such as Interest Rate Futures & Forward Rate Agreements) for purposes as may be permitted from time to time. The maximum derivative position will be restricted to 50% of the net assets of the Scheme. The cumulative gross exposure through equity, debt, units issued by REITs & InvITs and derivative positions shall not exceed 100% of the net assets of the Scheme, subject to provisions of SEBI circular dated August 18, 2010 w.r.t. investment in derivatives.

The Scheme may enter into repos/reverse repos including repo in corporate debt securities as may be permitted by RBI. The Scheme may participate in repo/reverse repo in corporate debt securities in line with the stipulated regulations. From time to time, the Scheme may hold cash. A part of the net assets may be invested in the Triparty repo (TREPS) or repo or in an alternative investment as may be provided by RBI to meet the liquidity requirements. The Scheme may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing, specified by SEBI from time to time.

The Scheme shall not deploy more than 20% of its net assets in securities lending. In addition to the above limit, in case of debt instruments, the Scheme shall not deploy more than 5% of the net assets in securities lending to any single counter party.

Pending deployment of funds in securities in terms of investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of the Scheduled Commercial Banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as may be amended from time to time.

Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view the market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Fund Manager, the intention being, at all times, to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and defensive considerations. The Fund Manager will restore asset allocation in line with the asset allocation pattern within 30 days.

In case the portfolio is not re-balanced within 30 days, justification for the same shall be recorded in writing and will be placed before the investment committee. The investment committee will then decide on further course of action.

## Investment Strategy of the Scheme

The Scheme seeks to generate capital appreciation from a concentrated portfolio of upto 20 stocks, which may result in higher risk. The Scheme will adopt a multi-cap investment approach with a flexibility to invest across large, mid and small cap companies. The stock selection will be guided by our investment philosophy and proprietary stock categorization framework. Our process driven approach and categorization framework will assist us in filtering the high conviction investment ideas and contain the downside risk. The Scheme will adopt a fully invested approach comprising of both growth and value stocks.

## Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

### • Concentration Risk:

The scheme is expected to run a significantly concentrated strategy comprising of a maximum of 20 stocks. This will likely mean stock weights on average being materially higher than underlying benchmark weights. This may lead to higher volatility in scheme's performance and divergence of portfolio performance vis-à-vis the benchmark over different periods. The scheme structure may also differ on sector exposures compared to those in the benchmark.

### • Risk associated with Equity and Equity Related Instruments:

Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, general decline in the Indian markets, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAVs of the Units issued under the Scheme may be adversely affected.

Further, the Equity and Equity Related Instruments are risk capital and are subordinate in the right of payment to other securities, including debt securities.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

Further, the volatility of medium / small - capitalization stocks may be higher in comparison to liquid large capitalisation stocks.

- Risks associated with investing in fixed income and money market instruments involve interest - rate risk, credit risk, liquidity or marketability risk, re-investment risk, volatility risk etc.
- Risks associated with investing in ADR/GDR and foreign securities involve fluctuation in foreign exchange rates, restriction on repatriation of capital and earnings under the exchange control regulations and transaction procedure in overseas market. The exchange risk associated with a foreign denominated instrument is a key element in foreign investment.
- Risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Other risks include risk of mispricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price.

### • Risk Factors Associated with repo transaction in Corporate Debt Securities:

**Counterparty Risk:** This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. Fund Manager will endeavor to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis and / or with entities regulated by SEBI/RBI/IRDA. In the event of default by the repo counterparty, the Scheme will have recourse to the corporate debt securities given as collateral to recover the investment by selling the collateral in the market. However, selling of collateral will also be subject to liquidity risk in the market and the Scheme may incur impact cost at the time of selling the collateral.

**Collateral Risk:** Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations or there is downward migration in rating of collateral. Further if the rating of collateral goes below the minimum required rating during the term of repo or collateral becomes ineligible for any reason, counterparty will be expected to substitute the collateral. In case of failure to do so, IAMI / Schemes of the Fund will explore the option for early termination of the trade.

• **Risks associated with Securitised Debt**

Risk associated with investing in securitised debt involve interest rate risk, prepayment risk, credit or default risks. Further, Asset Backed Security has structure risk due to a unique characteristic known as early amortization or early payout risk.

• **Risks associated with Securities Lending**

**For Equity Instruments:** As with other modes of extensions of credit, there are risks inherent to securities lending. During the period the security is lent, the Scheme may not be able to sell such security and in turn cannot protect from the falling market price of the said security. Under the current securities lending and borrowing mechanism, the Scheme can call back the securities lent any time before the maturity date of securities lending contract. However, this will be again the function of liquidity in the market and if there are no lenders in the specified security, the Scheme may not be able to call back the security and in the process, the Scheme will be exposed to price volatility. Moreover, the fees paid for calling back the security may be more than the lending fees earned by Scheme at the time of lending the said security and this could result in loss to the Scheme. Also, during the period the security is lent, the Fund will not be able to exercise the voting rights attached to the security as the security will not be registered in the name of the Scheme in the records of the Depository/ issuer.

**For Debt Instruments:** As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

• **Risk Factors associated with investments in REITs and InvITs**

• **Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.

• **Liquidity Risk:** As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

• **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

• **Regulatory/Legal Risk:** REITs and InvITs being new asset classes, rights of unit holders such as right to information etc. may differ from existing capital market asset classes under Indian Law.

• **Risks associated with Short Selling**

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations. Short positions carry the risk of losing money and these losses may grow unlimited theoretically if the price of the stock increases without any limit. This may result in major loss to the Scheme. At times, the participants may not be able to cover their short positions, if the price increases substantially. If numbers of short sellers try to cover their position simultaneously, it may lead to disorderly trading in the stock and thereby can briskly escalate the price even further making it difficult or impossible to liquidate short position quickly at reasonable prices. In additions, short selling also carries the risk of inability to borrow the security by the participants thereby requiring the participants to purchase the securities sold short to cover the position even at unreasonable prices.

**Risks associated with segregated portfolio**

a) Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.

b) Security(ies) held in segregated portfolio may not realize any value.

c) Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

**Additional risks associated with the CE rated papers**

In addition to all the risks associated with the plain vanilla instruments like NCDs / Money market instruments etc., any instrument rated with the suffix (CE) is exposed to various additional risks on the basis of the explicit underlying Credit enhancement (CE) from a third party/ parent/ group company, in the form of corporate guarantee/ letter of comfort/ pledge of shares etc. The risk involved are:

• If the Credit Enhancement is in the form of Corporate Guarantee / Letter of Comfort, then there is a legal risk of enforcing the Corporate Guarantee / Letter of Comfort along with the credit risk pertaining to the Credit Enhancement provider.

• If the Credit Enhancement is in the form of pledge of shares, then the additional risks are those associated with equity price movement, share collateral cover, liquidity of shares pledged as collateral in the secondary market, availability of free shares with the CE provider to be provided as additional collateral. Further there is also a legal risk of enforcing the pledge of shares, operational risk in selling the shares in secondary market & the underlying impact cost.

• If the Credit Enhancement is in any other form, then there is a risk pertaining to legal enforceability of the credit enhancement and credit risk of the credit enhancement provider.

**Risk Mitigation Strategies:**

**For Equity and Equity Related Instruments:**

Type of Risk	Measures to mitigate risk
Volatility Risk	By monitoring sector / company exposure at portfolio level.
Liquidity Risk	The Fund Manager will control the liquidity at portfolio construction level.
Concentration Risk	By diversifying across stocks / sectors, concentration risk can be reduced. The Fund Manager will endeavor to build well diversified portfolios within the overall fund specific investment strategy, which will help in controlling concentration risk.

**Requirement of Minimum Investors in the Scheme**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over 25% limit. Failure on the part of the said investor to redeem his exposure over 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

**Plans and Options**

The Scheme offers a separate Plan for investments directly with the Fund (i.e. application not routed through Distributor).

Thus, the Scheme offers two plans as follows:

- Regular Plan
- Direct Plan

Each of the above Plans under the Scheme offers following options:

- Growth option
- Dividend option :

Investments under Direct Plan can be made through various modes offered by the Fund for investing directly with the Fund (except Stock Exchange Platform(s) and all other Platform(s) where investors' applications for subscription of units are routed through Distributors). Further Registered Investment Advisors (RIAs) can also purchase units of Direct Plan on behalf of their clients through NMF-II platform of National Stock Exchange of India Ltd. and/or BSE STAR MF System of BSE Ltd. The portfolio of Direct Plan will form part of portfolio of the Scheme and there will be no separate portfolio for Direct Plan. Further, all the options i.e. Growth and Dividend will have common portfolio under the Scheme.

**If dividend payable under dividend payout option is equal to or less than Rs. 100/-, then the dividend would be compulsorily reinvested in the option of the Scheme.**

<p><b>Stamp duty</b></p>	<p>Pursuant to Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019 read with subsequent Notification No. S.O. 1226 (E) and G.S.R. 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, a stamp duty @ 0.005% of the Transaction Value will be levied on applicable mutual fund transactions i.e. purchases (including switch-in, dividend reinvestment etc.). Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase, switch-in, installment of Systematic Investment Plan, Systematic Transfer Plan and reinvestment of dividend to the unitholders will be lower to that extent. The stamp duty will be arrived at using inclusive method of calculation. For applying stamp duty, Transaction Value will be calculated after deducting transaction charges and such other charges as may be applicable from time to time. The calculation of stamp duty is explained as follows:</p> <p>If an investor subscribes units for Rs.1,00,000/- through a distributor and transaction charges payable to distributor are Rs.100/-, then stamp duty will be calculated as follows:</p> <p>Transaction Value = Subscription Amount - Transaction Charges (i.e. 1,00,000-100) = 99,900/-</p> <p>Stamp Duty = (Transaction Value / 100.005) * 0.005  = (99,900/100.005) * 0.005  = 4.99</p> <p>Accordingly, the amount of stamp duty of Rs. 4.99 will be deducted from the transaction value and for the balance amount, units will be allotted at applicable NAV.</p>

No. of Installments	12

STP Start Date	3rd of the month

### Calculation of Flex STP installment amount on the date of the fifth installment i.e. January 3, 2017.

  - Hence, the market value of investment in the Transferee Scheme on the date of transfer of fifth instalment i.e. January 3, 2017 will be Rs 9,876/- (823\*12).  
The installment amount for fifth instalment will be calculated as follows:
    - Fixed amount to be transferred per installment: Rs. 3,000/- Or
    - As determined by the formula:  $(3,000*5) - 9,876 = Rs. 5,124/-$ .  
a. Or b. whichever is higher :
- Hence, the installment amount to be transferred in the Transferee Scheme on January 3, 2017 will be Rs. 5,124/-.
