Invesco India Multi Asset Allocation Fund

(An open ended scheme investing in Equity, Debt, Gold ETFs / Silver ETFs)

This product is suitable for investors who are seeking*:	Scheme Riskometer	Benchmark Riskometer
<ul style="list-style-type: none"> capital appreciation/income over long term investment in diversified portfolio of instruments across multiple asset classes. <p>*Investors should consult their financial advisers if in doubt about whether the product is suitable for them</p>	<p>Invesco India Multi Asset Allocation Fund</p>  <p>The risk of the scheme is Very High</p>	<p>As per AMFI Tier 1 Benchmark i.e. Nifty 200 TRI (60%) + CRISIL 10 year Gilt Index (30%) + Domestic Price of Gold (5%) + Domestic Price of Silver (5%)</p>  <p>The risk of the benchmark is High</p>

**A winning team
needs people with
complementary
skills**

A well rounded portfolio too needs asset classes with complementary traits.

As no single asset class can deliver in all types of market conditions, choose **Multi Asset Allocation Funds** that pick the right mix of assets to capture opportunities.

Performance of asset classes varies during different time frame...

Low correlation among asset classes provides diversification

Daily Returns Correlation between asset classes (From June 30, 2020 to June 30, 2025)

Asset Class	Domestic Equity	Overseas Equity	Debt	Gold	Silver
Domestic Equity	1.00				
Overseas Equity	0.13	1.00			
Debt	0.08	-0.04	1.00		
Gold	0.03	0.02	0.08	1.00	
Silver	0.13	0.06	0.08	0.61	1.00

Past performance may or may not be sustained in future.

Source: ICRA MFI Explorer, Internal. Data as on June 30, 2025. Domestic Equity is represented by Nifty 200 TRI, Overseas Equity is represented by INR returns of S&P 500 TR, Debt by CRISIL 10 year Gilt index, Gold by MCX spot gold prices and Silver by MCX spot silver prices. Correlation measures how two variables move in relation to each other and can range from +1 (perfect positive correlation) to -1 (perfect negative correlation). Positive correlation implies that if one variable moves either up or down, the other variable will move in the same direction. Alternatively, negative correlation implies that if one variable moves in either direction, other one will move in the opposite direction.

Note: Returns are Compounded Annual Growth Rate (CAGR). Volatility/Risk is calculated based on monthly returns and is annualized. Volatility/Risk is represented by standard deviation. Standard deviation is a statistical measure of the range of an investment's performance.

Disclaimer: The above simulation explains the return generated over a 5 year period by different asset classes and combination of asset classes. This is for illustration purpose only and should not be construed as a promise on minimum returns and safeguard of capital. Invesco Asset Management (India) Private Limited/Invesco Mutual Fund is not guaranteeing or promising or forecasting any returns.

Presenting
**Invesco India
Multi Asset
Allocation Fund**

(An open ended scheme investing
in Equity, Debt, Gold ETFs / Silver
ETFs)

Invesco India Multi Asset Allocation Fund

Benefit of 3 asset classes in single fund

Active multi asset allocation strategy follows proprietary framework and aims to navigate all market conditions.

Monthly optimization of asset classes in response to changing macro & risk regime which facilitates quick alignment of portfolio allocations¹.

Dynamic allocation between domestic and overseas equities².

Framework allows to capture prevalent investment opportunities without being bound to a static asset allocation approach due to taxation.

Risk management is embedded at every stage of the investment process.

A simple and convenient way of getting exposure to multiple asset classes.

Notes - ¹The Fund manager will endeavour to allocate the net asset of the scheme to different asset classes based on the results of asset allocation framework at a monthly frequency. However, the fund manager at his sole & absolute discretion reserves the right to not allocate the asset allocation based on the results of asset allocation framework.

²The Scheme will invest in Overseas securities / Overseas ETFs on an ongoing basis. The Scheme intends to invest USD 25 Million subject to residual regulatory limit in overseas securities during a period of six months from the date of closure of New Fund Offer. The Scheme may make investments in overseas securities (i.e. ADRs, GDRs etc.) upto the available limit at the Fund level.

Investments in Overseas ETFs is temporarily suspended and will be allowed once the communication is received from SEBI / AMFI.

Our multi asset allocation framework

Exposure to Overseas securities³ upto 35% of the portfolio

Notes: The Scheme also has an enabling provision to invest upto 10% of net assets to units issued by REITs and INVTs. For more details of asset allocation, please refer Scheme Information Document (SID) of the Scheme.

³The Scheme will invest in Overseas securities / Overseas ETFs on an ongoing basis. The Scheme intends to invest USD 25 Million subject to residual regulatory limit in overseas securities during a period of six months from the date of closure of New Fund Offer. The Scheme may make investments in overseas securities (i.e. ADRs, GDRs etc.) upto the available limit at the Fund level. Investments in Overseas ETFs is temporarily suspended and will be allowed once the communication is received from SEBI / AMFI.

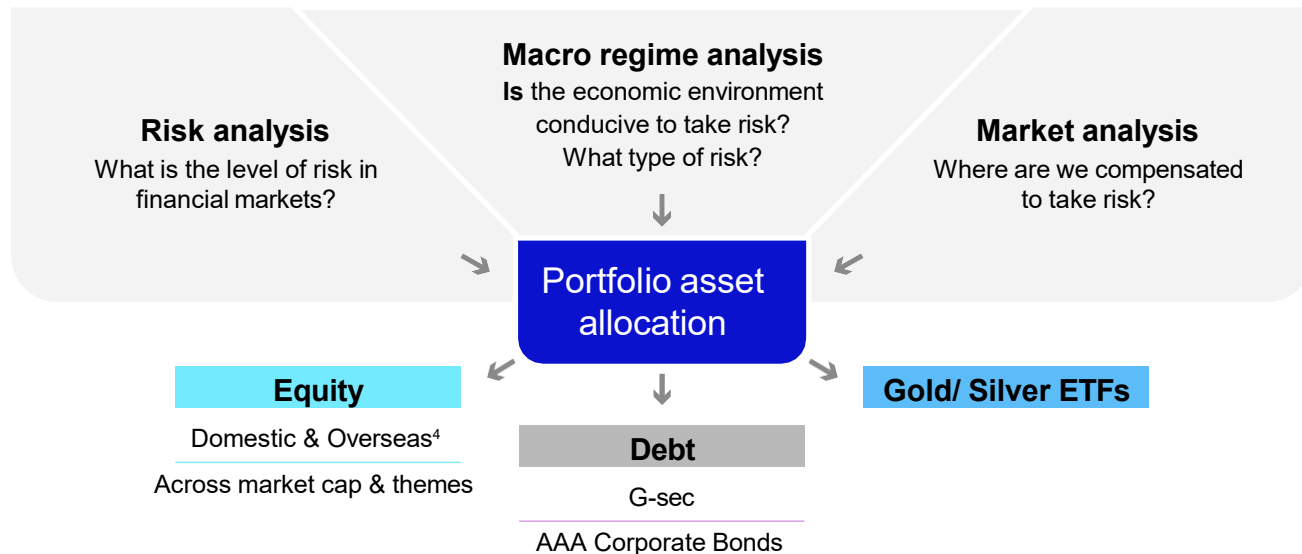

At the core of asset allocation framework is macro analysis, supported by market and risk analysis

We believe

Market returns are cyclical.
Opportunities and risks change due to changing macro environment.

Risks and correlations also vary in different macro regimes.

Asset allocation should seek to **capitalize on changing market opportunities**, without taking **undue risk** over a full cycle.

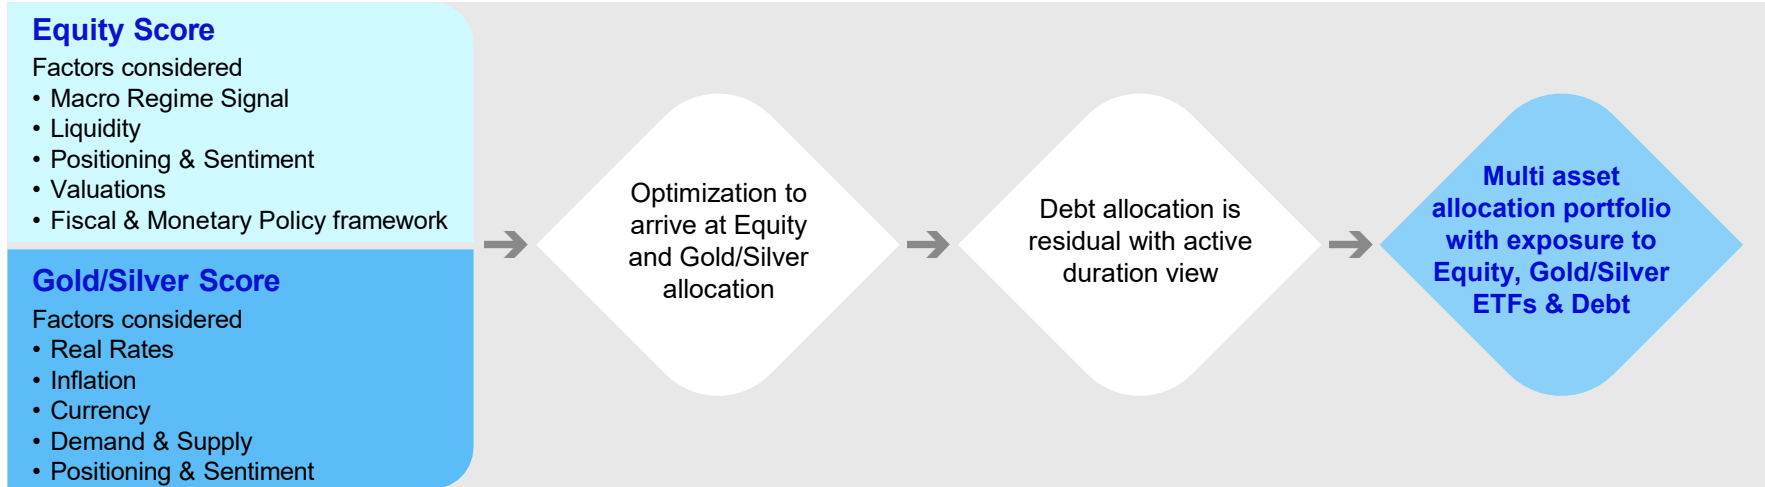

Notes: Based on current views and may change from time to time

⁴The Scheme will invest in Overseas securities / Overseas ETFs on an ongoing basis. The Scheme intends to invest USD 25 Million subject to residual regulatory limit in overseas securities during a period of six months from the date of closure of New Fund Offer. The Scheme may make investments in overseas securities (i.e. ADRs, GDRs etc.) upto the available limit at the Fund level. Investments in Overseas ETFs is temporarily suspended and will be allowed once the communication is received from SEBI / AMFI.

Our endeavour is to arrive at optimal allocation to equity and gold/silver with residual exposure to debt⁵

Monthly reallocation ensures active asset allocation

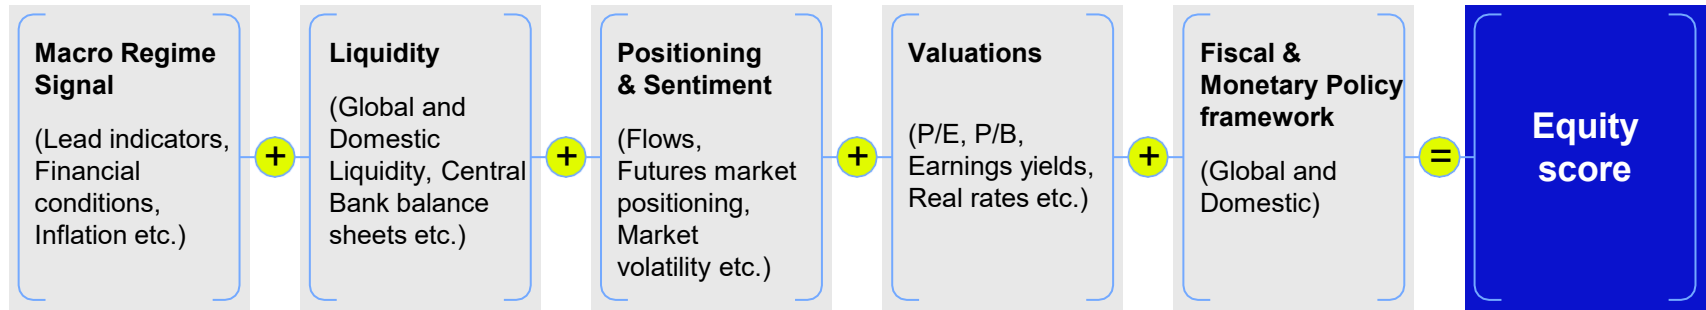

← Risk management is embedded at every stage of the investment process →

⁵**Note:** The Scheme will invest minimum 10% of net assets to each asset class i.e. Equity, Debt and Gold/Silver (through ETFs). The Fund manager will endeavour to allocate the net asset of the scheme to different asset classes based on the results of asset allocation framework at a monthly frequency. However, the fund manager at his sole & absolute discretion reserves the right to not allocate the asset allocation based on the results of asset allocation framework.

Disclaimer: The asset allocation framework is proprietary for Invesco India Multi Asset Allocation Fund. The framework is used to assess the range of asset allocation and final decision on asset allocation is that of the fund manager based on his/her perception of the market at the given point in time. The framework is used to explain allocation of assets between Equity, Debt and Gold/Silver ETFs for Invesco India Multi Asset Allocation Fund and should not be construed as any asset allocation recommendation or to build any portfolio strategy from Invesco Asset Management (India) Private Limited and / or Invesco Mutual Fund.

Factors guiding Equity allocation

Each factor is assigned a weightage with **highest weightage given to Macro Regime Signal**.

Allocation score is assigned for each of the 5 parameters and weighted average Equity score is calculated.

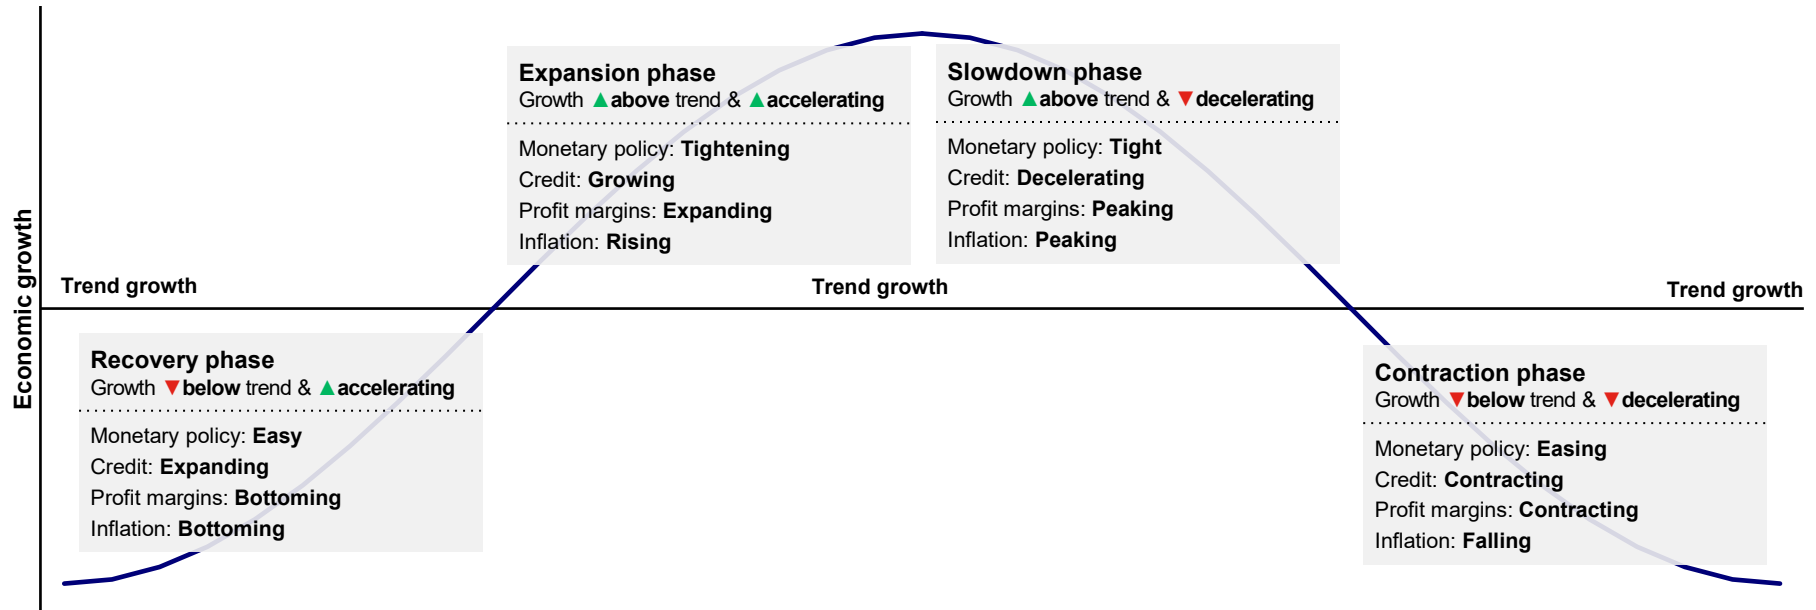

P/E: Price to Earnings, P/B: Price to Book

Disclaimer: The asset allocation framework is proprietary for Invesco India Multi Asset Allocation Fund. The framework is used to assess the range of asset allocation and final decision on asset allocation is that of the fund manager based on his/her perception of the market at the given point in time. The framework is used to explain allocation of assets between Equity, Debt and Gold/Silver ETFs for Invesco India Multi Asset Allocation Fund and should not be construed as any asset allocation recommendation or to build any portfolio strategy from Invesco Asset Management (India) Private Limited and / or Invesco Mutual Fund.

Macro regime analysis – A key determinant for Equity allocation

Helps to gauge the phase of global macro cycle and relative strength of domestic vs. overseas economy

Phases based on the expected level and change in Economic growth across domestic and global economies

Disclaimer: The Macro regime parameter mentioned above is one of the parameters for determining the equity allocation of the portfolio. The same is not an exhaustive list. There are many other parameters which the asset allocation framework would consider to determine the asset allocation to equity.

Combining elements of macro regime analysis with factors such as liquidity, valuation, positioning and policy help to arrive at Equity allocation

Input: A wide range of data

Business Spending e.g. PMI, corporate margins, capex

Consumption e.g. Retail sales, auto sales, airline bookings

Manufacturing and Construction Activity e.g. New orders, inventory, building permits

Labour market e.g. Payrolls, jobless claims, unemployment rate

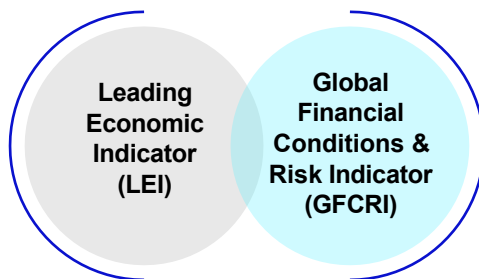

Monetary and Financial Conditions e.g. Credit growth, M2 growth, credit spreads

Asset performance e.g. Cyclical vs. Defensives, Copper/Gold ratio, Growth vs. Value

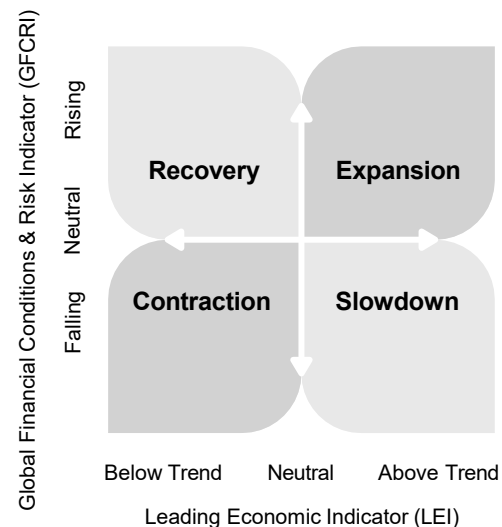

Integrating LEI and GFCRI

Leading Economic Indicator (LEI) indicates whether growth is likely to be above, below or at trend

Global Financial Conditions & Risk Indicator (GFCRI) helps to determine market growth expectations & risk premia

Output: Expected macro regimes

PMI: Purchasing Managers' Index

Factors guiding Gold/Silver allocation

Allocation score is assigned for each of the 5 parameters and weighted average Gold/Silver score is calculated.

Disclaimer: The asset allocation framework is proprietary for Invesco India Multi Asset Allocation Fund. The framework is used to assess the range of asset allocation and final decision on asset allocation is that of the fund manager based on his/her perception of the market at the given point in time. The framework is used to explain allocation of assets between Equity, Debt and Gold/Silver ETFs for Invesco India Multi Asset Allocation Fund and should not be construed as any asset allocation recommendation or to build any portfolio strategy from Invesco Asset Management (India) Private Limited and / or Invesco Mutual Fund.

Monthly reallocation - Key to our investment approach

Monthly returns of various asset classes are skewed thus providing an opportunity to benefit from tactical allocation

% of observations with returns (in INR terms) $\geq +5\%$ & $\leq -5\%$

YTD data as on June 30, 2025

Past performance may or may not be sustained in future.

Disclaimer: The above is a simulation taking into consideration the monthly returns of the respective indices from January 2004 till February 2025 and shows the % of times the returns were greater than equal to 5% or less than equal to -5% in the period under consideration. The same is for illustration purpose only and should not be construed as any asset allocation recommendation or to build any portfolio strategy from Invesco Asset Management (India) Private Limited and / or Invesco Mutual Fund.

Let's see how asset allocation has moved based on our framework scores

Asset Allocation (% of Net Assets)

Note: ⁶The Scheme will invest in Overseas securities / Overseas ETFs on an ongoing basis. The Scheme intends to invest USD 25 Million subject to residual regulatory limit in overseas securities during a period of six months from the date of closure of New Fund Offer. The Scheme may make investments in overseas securities (i.e. ADRs, GDRs etc.) upto the available limit at the Fund level. Investments in Overseas ETFs is temporarily suspended and will be allowed once the communication is received from SEBI / AMFI.

⁷Debt allocation includes allocation to Debt oriented Mutual Fund as well.

Disclaimer: The above is a simulation to show what would have been the allocation to different asset classes based on the results of proprietary asset allocation framework which takes into account various parameters / variables. The same is for illustration purpose only and should not be construed as any asset allocation recommendation or to build any portfolio strategy from Invesco Asset Management (India) Private Limited and / or Invesco Mutual Fund.

Our investment preferences within asset classes

Focus on asset allocation mix to deliver better risk-reward outcome

Equity

Investment across Largecap stocks basis our proprietary equity investment process

Exposure to Midcaps predominantly through Index Funds/ETFs

Investment in overseas securities⁸ subject to limits available

Debt

Investments focusing on high credit quality and liquidity

Investments predominantly in Government Securities & AAA Corporate Bonds

Portfolio duration managed dynamically in line with macro regime and demand-supply dynamics

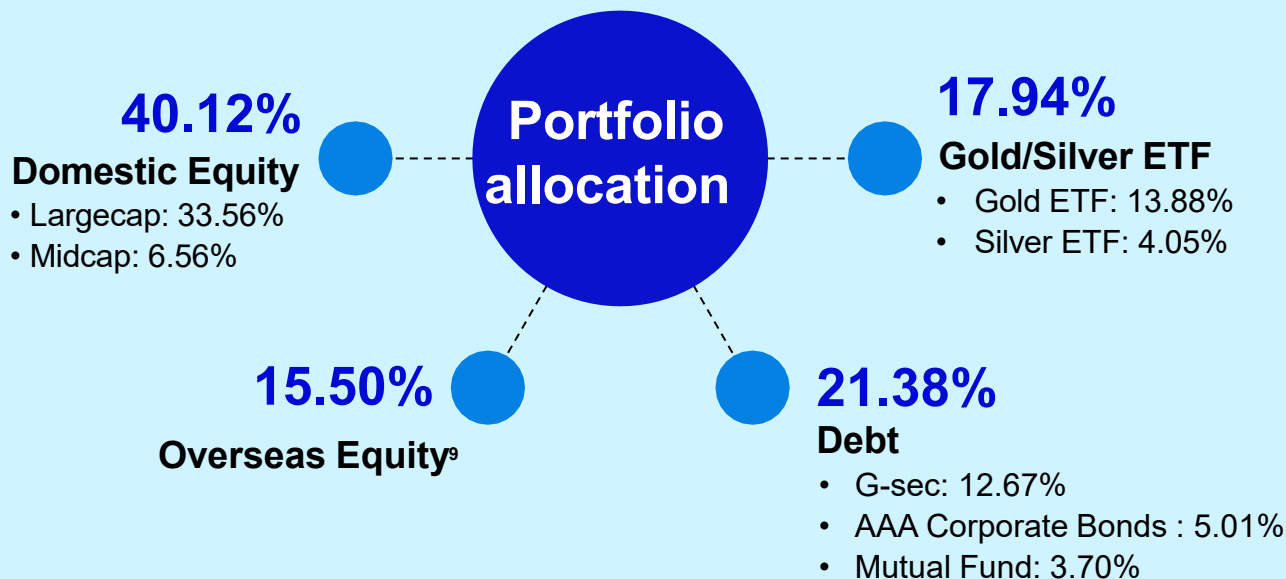

Gold/ Silver ETFs

Investments based on attractiveness of Gold and/or Silver

Note: ⁸The Scheme will invest in Overseas securities / Overseas ETFs on an ongoing basis. The Scheme intends to invest USD 25 Million subject to residual regulatory limit in overseas securities during a period of six months from the date of closure of New Fund Offer. The Scheme may make investments in overseas securities (i.e. ADRs, GDRs etc.) upto the available limit at the Fund level. Investments in Overseas ETFs is temporarily suspended and will be allowed once the communication is received from SEBI / AMFI.

Current portfolio asset allocation

Portfolio as on June 30, 2025

Data as on June 30, 2025

⁹**Note:** The Scheme will invest in Overseas securities / Overseas ETFs on an ongoing basis. The Scheme intends to invest USD 25 Million subject to residual regulatory limit in overseas securities during a period of six months from the date of closure of New Fund Offer. The Scheme may make investments in overseas securities (i.e. ADRs, GDRs etc.) upto the available limit at the Fund level. Investments in Overseas ETFs is temporarily suspended and will be allowed once the communication is received from SEBI / AMFI.

Disclaimer: Pursuant to para 2.7 of SEBI Master Circular dated June 27, 2024: Largecap companies means 1st - 100th company in terms of full market capitalization, mid cap companies mean 101st - 250th company in terms of full market capitalization and Small Cap companies mean 251st company onwards in terms of full market capitalization or such other companies as may be specified by SEBI from time to time. The market capitalization is based on an average full market capitalization of a stock for previous six months on all the stock exchanges where the stock is listed.

Key facts

Type of the scheme	An open ended scheme investing in Equity, Debt, Gold ETFs / Silver ETFs		
Investment Objective	To generate long-term capital appreciation/income from an actively managed portfolio of multiple asset classes. There is no assurance that the investment objective of the Scheme will be achieved		
Asset Allocation	Under normal circumstances, the asset allocation of the Scheme would be as follows:		
	Type of Instruments	Indicative Allocations (% of net assets)	
		Minimum	Maximum
	Equity & Equity Related Instruments	10	80
	Debt and Money Market Instruments	10	80
	Gold / Silver ETFs	10	50
	Units issued by REITs and InvITs	0	10
Minimum Application Amount	Rs. 1,000/- per application and in multiples of Re. 1 thereafter. For Systematic Investment Plan (SIP):		
	Options	Minimum Amount	Minimum Installments
	Monthly	Rs. 500/- per month and in multiples of Rs. 1 thereafter	12
		Rs. 1,000/- or more per month and in multiples of Rs. 1 thereafter	6
	Quarterly	Rs. 1,500/- per quarter and in multiples of Rs. 1 thereafter	4
Plans[^] / Options (Applicable to Direct Plan also)	Regular Plan and Direct Plan <ul style="list-style-type: none"> • Growth Option • Income Distribution cum capital withdrawal ('IDCW') <ul style="list-style-type: none"> • IDCW Payout • IDCW Reinvestment (if IDCW payable under IDCW payout option is equal or less than Rs. 100/- then the IDCW would be compulsory reinvested in the respective plan/option of the Scheme)		
Exit Load[#]	For each purchase of units through Lumpsum / switch-in / Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) and IDCW Transfer Plan, exit load will be as follows: <ul style="list-style-type: none"> • if upto 10% of Units allotted are redeemed / switched-out within 1 year: Nil • for any redemption / switch-out in excess of 10% of units within one year: 1% • if units are redeemed or switched-out after 1 year: Nil • Switch between the Plans under the Scheme: Nil 		
Fund Managers*	Mr. Taher Badshah (Asset Allocation & Equities) & Mr. Krishna Cheemalapati (Fixed Income & Gold/Silver ETFs)		
Benchmark	Nifty 200 TRI (60%) + CRISIL 10 year Gilt Index (30%) + Domestic Price of Gold (5%) + Domestic Price of Silver (5%)		

[^]Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

[#]Exit Load charged, if any, will be credited back to the scheme, net of Goods & Services Tax.

* Pursuant to change in fund management responsibilities, Mr. Dhimant Kothari (Equities) has ceased to be Fund Manager with effect from close of business hours of July 1, 2025
